

# Koalapay module for PrestaShop

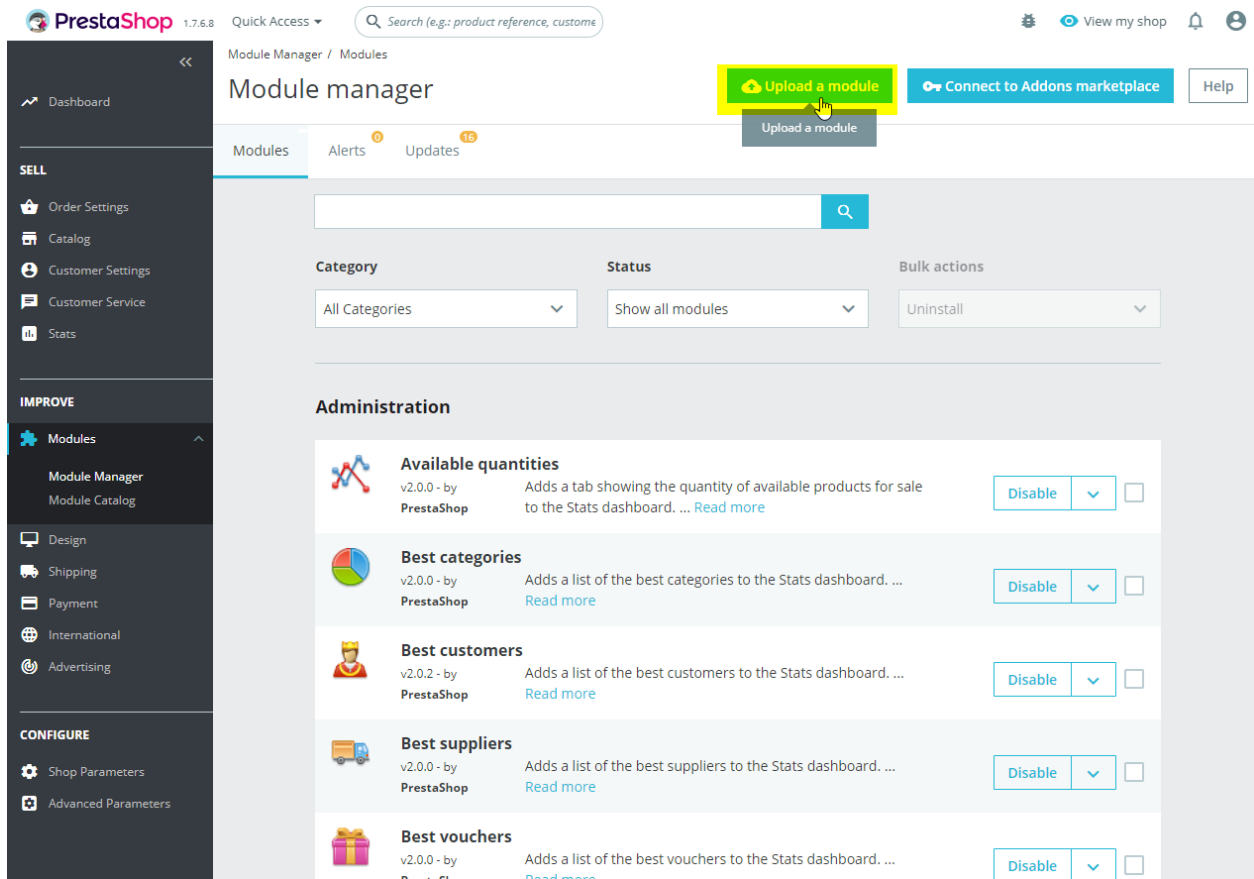

20/11/2020

[www.stigmi.eu](http://www.stigmi.eu)

1. Install the module .....	3
2. Configure the module .....	4
3. Get an API token .....	5
4. Copy the token in the module settings .....	7
5. Configure the other settings.....	8
6. Manage your KoalaPay invoices.....	11

# 1. Install the module

Go to “Modules > Modules Manager” and click on “Install a module”

The screenshot shows the PrestaShop 1.7.6.8 interface. The top navigation bar includes the PrestaShop logo, version number, a search bar, and user options like 'View my shop' and 'Help'. The left sidebar contains a menu with sections: 'SELL' (Order Settings, Catalog, Customer Settings, Customer Service, Stats), 'IMPROVE' (Modules, Module Manager, Module Catalog), and 'CONFIGURE' (Shop Parameters, Advanced Parameters). The main content area is titled 'Module manager' and features a search bar, filters for 'Category' (All Categories), 'Status' (Show all modules), and 'Bulk actions' (Uninstall). Below these filters, the 'Administration' section lists several modules:

Module Name	Version	Description	Actions
Available quantities	v2.0.0 - by PrestaShop	Adds a tab showing the quantity of available products for sale to the Stats dashboard. ... <a href="#">Read more</a>	Disable   [v]   [ ]
Best categories	v2.0.0 - by PrestaShop	Adds a list of the best categories to the Stats dashboard. ... <a href="#">Read more</a>	Disable   [v]   [ ]
Best customers	v2.0.2 - by PrestaShop	Adds a list of the best customers to the Stats dashboard. ... <a href="#">Read more</a>	Disable   [v]   [ ]
Best suppliers	v2.0.0 - by PrestaShop	Adds a list of the best suppliers to the Stats dashboard. ... <a href="#">Read more</a>	Disable   [v]   [ ]
Best vouchers	v2.0.0 - by PrestaShop	Adds a list of the best vouchers to the Stats dashboard. ... <a href="#">Read more</a>	Disable   [v]   [ ]

Select or drag and drop the *koalipay.zip* file in the popup and then upload it.

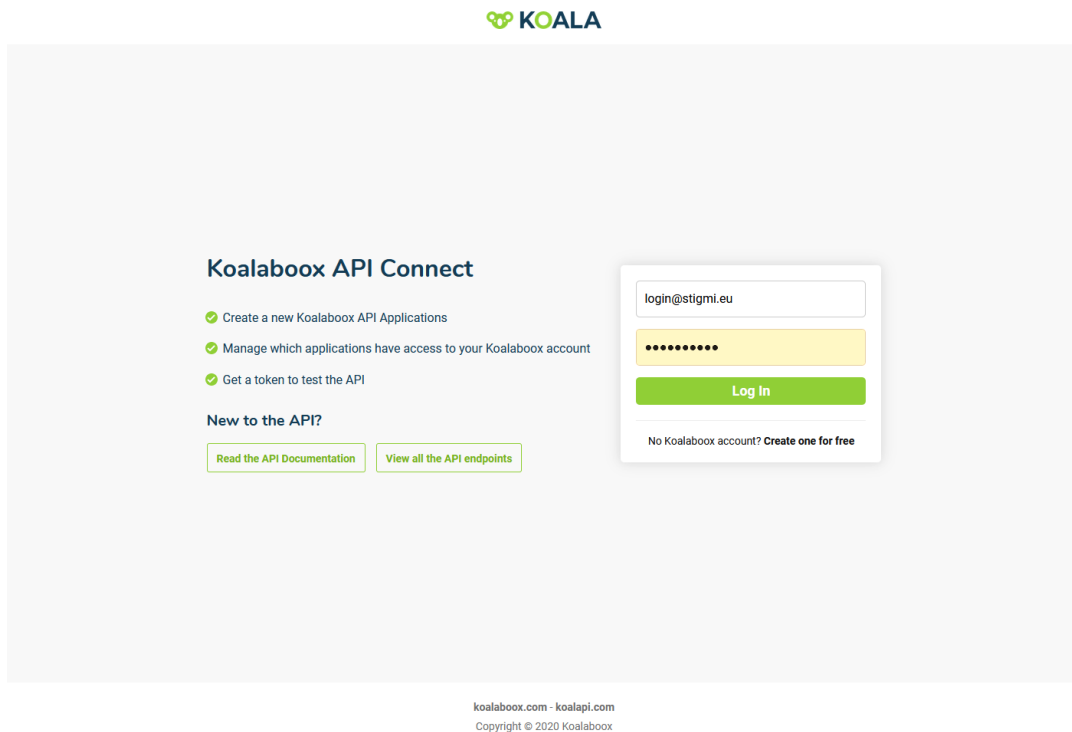

## 2. Configure the module

Go to “Modules > Modules Manager”, look for “Koalapay” and click on “Configure”

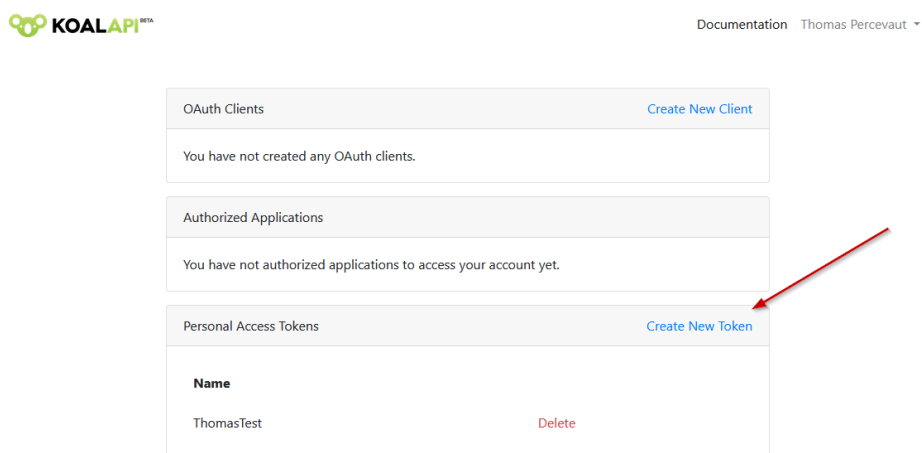

The screenshot displays the PrestaShop 1.7.6.8 Modules Manager interface. The left sidebar contains navigation menus for 'SELL', 'IMPROVE', and 'CONFIGURE'. The 'IMPROVE' section is active, showing 'Modules' as the selected category. The main content area is titled 'Module manager' and features a search bar with 'koala' entered. Below the search bar are filters for 'Category' (All Categories), 'Status' (Show all modules), and 'Bulk actions' (Uninstall). A table of modules is shown under the 'Other' heading, with one entry for 'Koalapay' (v1.0.0 by Stigma) described as a '30-days payment solution for professional buyers.' A yellow 'Configure' button is highlighted with a mouse cursor, and a dropdown arrow is visible next to it.

## 3. Get an API token

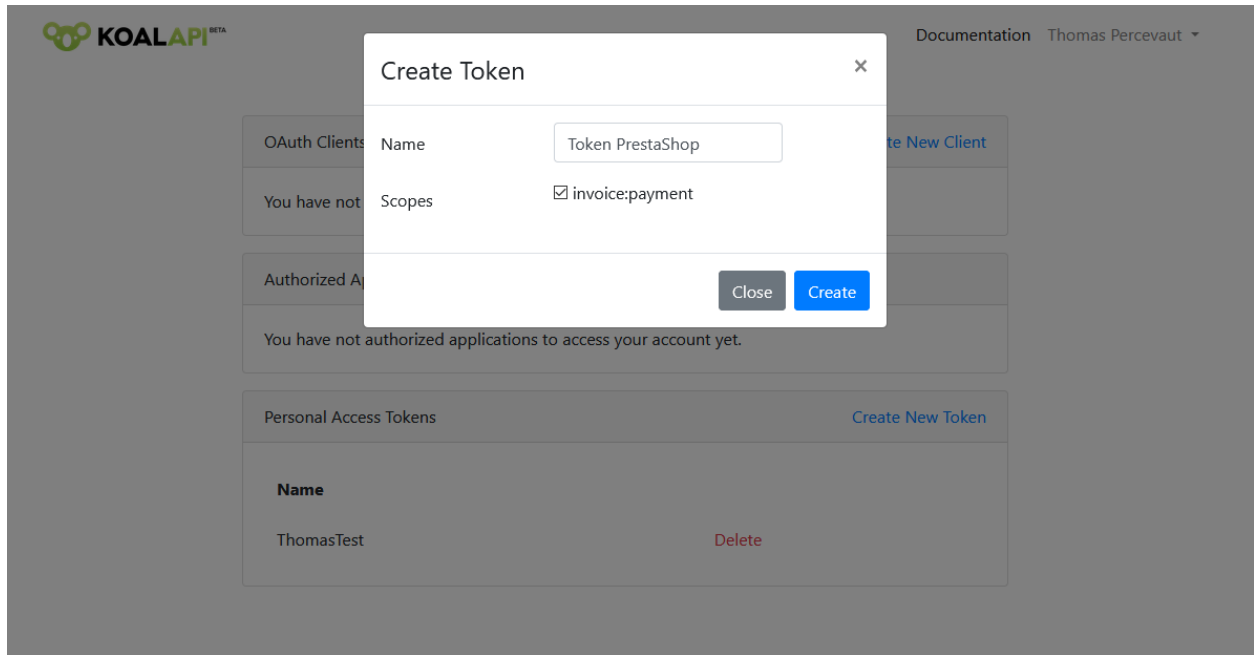

a) Go to <https://connect.koalaboox.com/> and login to your account

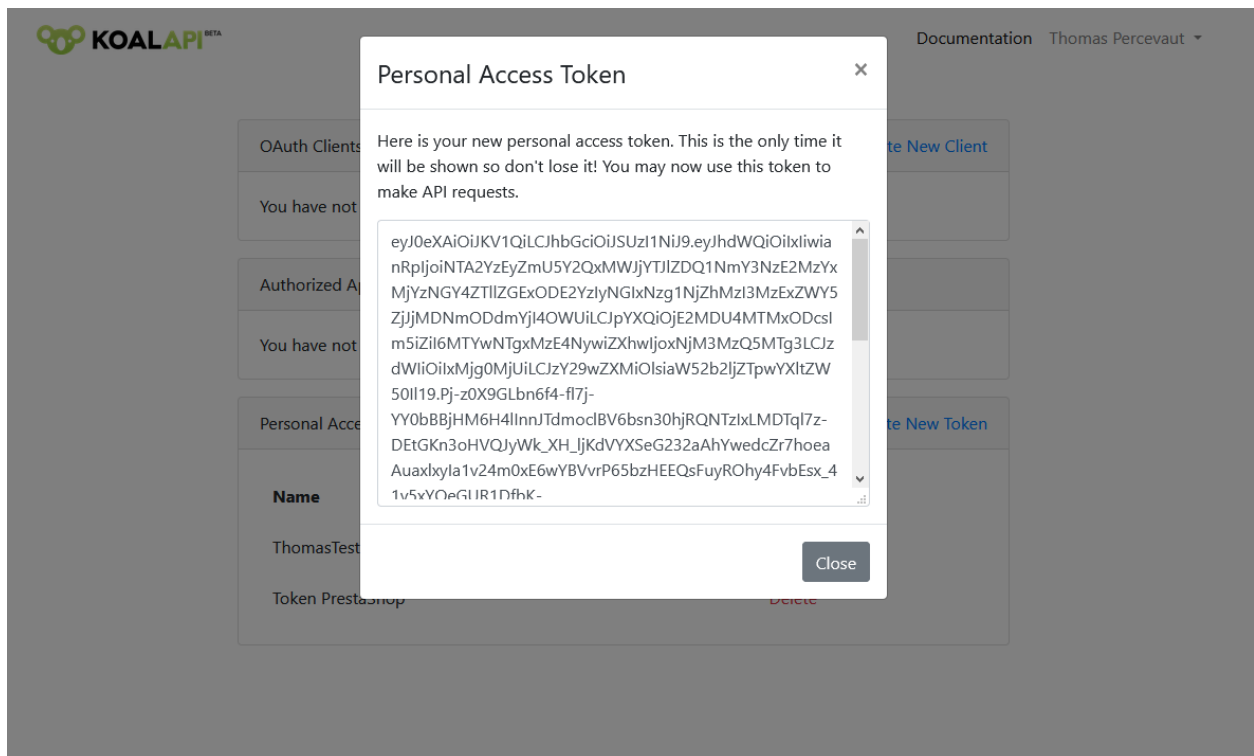

b) Create a new token

## c) Name the new token and tick the checkbox

## d) Copy-paste the token in a document: it will be displayed only once

## 4. Copy the token in the module settings

Go on the “My Account” tab and paste your Token API.

You should now be recognized after saving.

The screenshot shows the PrestaShop 1.7.6.8 interface for configuring the KoalaPay module. The left sidebar contains navigation menus for 'SELL', 'IMPROVE', and 'CONFIGURE'. The main content area is titled 'Configure Koalipay' and has three tabs: 'PRESENTATION', 'YOUR ACCOUNT', and 'SETTINGS'. The 'YOUR ACCOUNT' tab is active, displaying 'Your account information' with two columns: 'General' and 'Billing information'. The 'General' section lists details like subscription type (Ideal), name (Stigmi), and contact information. The 'Billing information' section lists name (Stigmi), email (tpe@stigmi.eu), VAT number, and address (131 rue de Créqui, 69003 Lyon, BE). Below this is the 'Financing Status' section, which is 'Eligible / Active' with a limit of 25000. The 'SETTINGS' tab is partially visible, showing the 'API Token' field with a long alphanumeric string and the 'API Url' field with the value 'https://connect.koalabox.com/api'. A 'Save' button is located at the bottom right of the settings area.

## 5. Configure the other settings

### a) Cron job

The module creates draft invoices each time a client sees the KoalaPay option. Configure the cron task to delete the drafts that have not been converted to final invoices + automatically update the invoices statuses from the last 2 months.

You need to configure a cron task on your server:

Copy/paste this cron url into your hosting panel or cron module to automatically delete unused generated invoices:

```
0 1 * * * curl "https://prestashop.stigmi.eu/gb/module/koalapay/cron?secure_key=V3GVHAMF2ZARJ7RC"
```

If you already had the "Cron tasks manager" installed, then you are already good to go!

**Other**

**Cron tasks manager**

v1.4.0 - by  
PrestaShop

Manage all your automated web tasks from a single interface.

Configure ▼

With this module, a job is automatically added when KoalaPay module is installed:

Task description	Target link	Hour	Day	Month	Day of week	Last execution	One shot	Active	
Koalapay	Module - Hook	01:00	Every day	Every month	Every day of the week	Never	✘	✔	Edit ▼

### b) Logs

Activate this option if you want the module to log events in the PrestaShop logs (Advanced Parameters > Logs).

This is especially helpful at the beginning to help debug if needed.

Log mode  YES  NO  
*Enable advanced logs?*

### c) Customer group

You can select the client groups that will be allowed to use the module.

This is useful if you have a mixed audience (B2C + B2B).

\* Customer Groups

<input type="checkbox"/>	ID	Group name
<input checked="" type="checkbox"/>	1	Visitor
<input checked="" type="checkbox"/>	2	Guest
<input checked="" type="checkbox"/>	3	Customer

*Enables Koalapay only if customers are in these groups*

### d) Invoice trigger

Koala will send an invoice to your client that replaces any other invoice (the one from PrestaShop but also the one that you may generate with another software).

This invoice should be sent when you ship the goods and you have multiple possibilities to do so:

- Send the invoice when a new order is created: YES / NO

You should only choose YES if you ship immediately.

- Order status selection

You can choose the order statuses that will trigger the emailing of the KoalaPay invoice (if the invoice has not already been sent). Alternatively, you can send the invoices manually in the KoalaPay.

Send the invoice when new order is created?

YES

NO

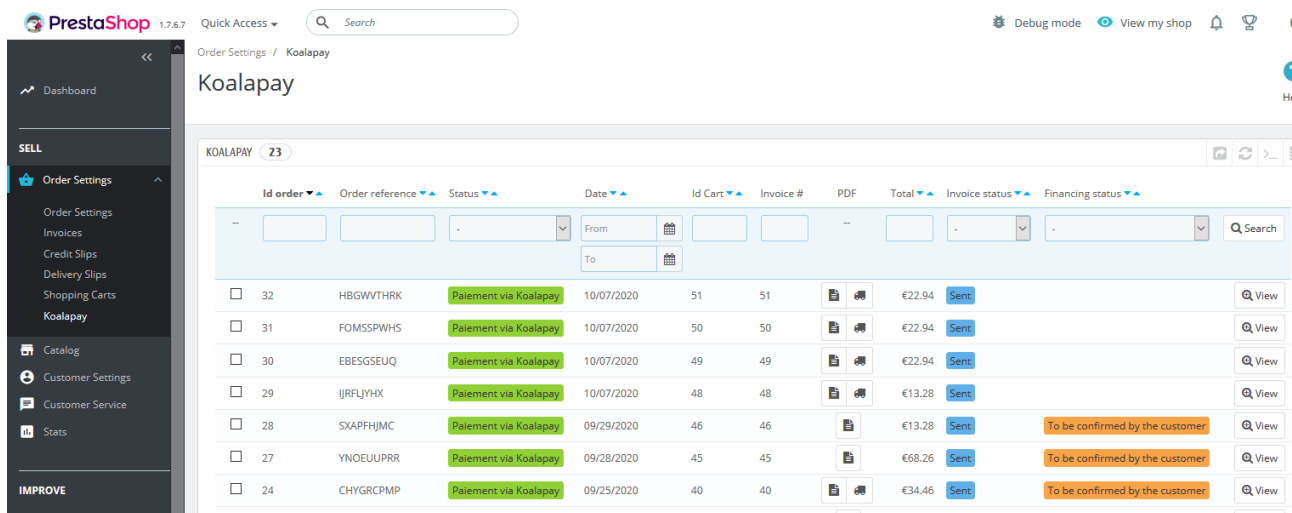

\* Order States

<input type="checkbox"/>	ID	Order State
<input type="checkbox"/>	17	Autorisation. A capturer par le marchand
<input type="checkbox"/>	10	Awaiting bank wire payment
<input type="checkbox"/>	13	Awaiting Cash On Delivery validation
<input type="checkbox"/>	1	Awaiting check payment
<input type="checkbox"/>	5	Delivered
<input type="checkbox"/>	19	En attente de capture
<input type="checkbox"/>	15	En attente de paiement par Carte de Crédit
<input type="checkbox"/>	16	En attente de paiement par moyen de paiement local
<input type="checkbox"/>	14	En attente de paiement par PayPal
<input type="checkbox"/>	12	On backorder (not paid)
<input type="checkbox"/>	9	On backorder (paid)
<input type="checkbox"/>	18	Partial refund
<input type="checkbox"/>	2	Payment accepted
<input type="checkbox"/>	8	Payment error
<input type="checkbox"/>	3	Processing in progress
<input type="checkbox"/>	7	Refunded
<input type="checkbox"/>	11	Remote payment accepted
<input checked="" type="checkbox"/>	4	Shipped
<input type="checkbox"/>	22	Treated

Order states that trigger the sending of the Koalipay invoice (if invoice has not already been sent)

## 6. Manage your KoalaPay invoices

You can find the list of all KoalaPay invoices in this menu: SELL >> Other Settings >> Koalapay

The screenshot shows the PrestaShop 1.7.6.7 interface with the 'Koalapy' module settings page. The left sidebar shows the 'SELL' menu with 'Koalapy' selected. The main content area displays a table of Koalapy invoices with 23 items. The table columns include Id order, Order reference, Status, Date, Id Cart, Invoice #, PDF, Total, Invoice status, and Financing status. The status column shows 'Paielement via Koalapy' for most items, and 'To be confirmed by the customer' for others. The 'Invoice status' column shows 'Sent' for most items, and 'To be confirmed by the customer' for others. The 'Financing status' column shows 'To be confirmed by the customer' for some items.

Id order	Order reference	Status	Date	Id Cart	Invoice #	PDF	Total	Invoice status	Financing status
32	HBGWVTHRK	Paielement via Koalapy	10/07/2020	51	51	PDF	€22.94	Sent	
31	FOMSSPWHS	Paielement via Koalapy	10/07/2020	50	50	PDF	€22.94	Sent	
30	EBESGSEUQ	Paielement via Koalapy	10/07/2020	49	49	PDF	€22.94	Sent	
29	IJRFLJYHX	Paielement via Koalapy	10/07/2020	48	48	PDF	€13.28	Sent	
28	SXAPFHJMC	Paielement via Koalapy	09/29/2020	46	46	PDF	€13.28	Sent	To be confirmed by the customer
27	YNOEUPRR	Paielement via Koalapy	09/28/2020	45	45	PDF	€68.26	Sent	To be confirmed by the customer
24	CHYGRCPMP	Paielement via Koalapy	09/25/2020	40	40	PDF	€34.46	Sent	To be confirmed by the customer

In this section, you can download Koala invoices (PDF format), see information about the related order and display the invoice status.

You can also trigger two mass actions:

1. Update the invoice status
2. Send the Koala invoice by email to your client. In this case, the invoice will be sent even if the client already received it
